Back End | Java, Spring Boot, NodeJS, PostgreSQL, MongoDB

Testing/Deployment | Jest, JUnit

Developer Tools | Git, npm, maeven, Agile Methodology, Jira

EXPERIENCE & PROJECTS

SSR Software Engineer | Santander

Mar 2023 - Present

Frontend Developer for the Cross Selling Team

JavaScript | Next.js | MUI | React | Jest

- Participated in various Frontend projects within the Cross Selling team, demonstrating my ability to collaborate effectively in a multidisciplinary team environment.
- Co-architected many of these projects from scratch with my team, designing innovative solutions to meet business objectives.
- Successfully led a migration project, transitioning from outdated frameworks to more modern ones.
- During my tenure with the Cross Selling team, I acquired valuable skills in creating engaging and functional user experiences, as well as problem-solving and user interface optimization.
- Played a significant role in testing these projects. This included extensive testing and debugging to meet high-quality standards and end-user satisfaction.

Freelance Full Stack | Lasaigues

Aug 2023 - Oct 2023

Full Stack Developer for a Web application that manages paddle courts

React | Java | Spring Boot | MongoDB

- Focused primarily on the Frontend development, creating an intuitive and user-friendly interface.
- Contributed to the Back-End to ensure seamless data handling and database management.

JR Software Engineer | Santander

Mar 2022 - Ene 2023

Frontend Developer for the Message and Communications Team

Java | Spring Boot | MongoDB | OracleDB | Next.js | React

- Initially joined the Messages and Communications team as a Backend Developer, responsible for completing email templates and ensuring their proper functionality.
- Transitioned to a Frontend project within the same team, taking on the role of creating emails and communications through a user-friendly interface.
- Collaborated closely with UX team members to maintain a consistent and appealing design in line with the organization's branding.

Java Developer | Artekium

Jun 2021 - Mar 2022

Java Developer for RUS team

Java | Spring | Angular | Informix

- Collaborated as a Backend Developer within the insurance team, where my primary responsibilities included policy creation and resolving numerous software defects (bugs).
- Additionally, participated in the Frontend development efforts, contributing to the design and implementation of a new user interface for policy creation.

Freelance Backend Developer | JuntosxOscar

Jan 2021 - Mar 2021

Backend Developer for a freelance project

JavaScript | React | NodeJS | PostgreSQL

- Web application that sold raffle tickets to help raise funds. This application has integration with Mercado Pago's Api.

EDUCATION

University of La Matanza - Associate's degree in Web Application Development

2019-2022
