React · Next.js · JavaScript · Formik · Java · Spring Boot · Node.js · MongoDB · OracleDB · PostgreSQL · Git · Jira · Agile Methodologies · MacOS · Docker

EXPERIENCE

Santander Tecnología Argentina — SSR Software Engineer (Jul 2023 – Present)
Part of the XSELL team, developing frontend applications for the Marketing department using React, Next.js, and Formik, integrated with backend services built in Spring Boot. Responsible for end-to-end development — from planning and implementation to testing and deployment — ensuring scalability and performance in customer-facing tools.

Santander Tecnología Argentina — Junior Software Engineer (Mar 2022 – Aug 2023)
Worked mainly in the MyA (Messages and Notices) team, focusing on backend development with Java and Spring Boot, and collaborating on frontend tasks with React. Participated in the full software lifecycle — development, testing, and deployment — contributing to the maintenance and enhancement of internal communication systems used across the bank.

Artekium Technology Studio — Java Developer (Jun 2021 – Mar 2022)
Participated in the RUS (Río Uruguay Seguros) insurance system project, mainly focused on backend development with Java 8 and Spring, implementing modules for the management of auto and general insurance products. This role served as my first professional experience, providing solid foundations in enterprise software development and agile teamwork.

EDUCATION

Universidad Nacional de La Matanza — Bachelor of Technology Management, Project Management (Mar 2024 – Dec 2025)
Universidad Nacional de La Matanza — Associate's Degree in Web Application Development, IT (2019 – Jul 2022)
